Python Developer

I had worked here as a python developer for one month where I have worked on three projects namely BMI Calculator, Password Generator and Chat Application.

PROJECTS

Advanced BMI Calculator

Project Link: <https://github.com/yashijain22/BMICALculator>

This BMI calculator is designed to provide a comprehensive analysis of Body Mass Index based on user input. It includes advanced features for accurate health assessment and user customization.

Password Generator

Project Link: <https://github.com/yashijain22/PasswordGenerator>

This Python application provides a robust and customizable password generation tool with a graphical user interface (GUI) built using Tkinter. It allows users to generate strong passwords according to specified complexity and security rules, facilitating secure credential management.
